5 STEPS
TO USE DB LAB SPACE

2 attachments **DOWNLOAD**

kkowshalyaa.pem

1

### DOWNLOAD PRIVATE KEY.

Download the file ending with .pem attached with this e-mail.

2

OPEN TERMINAL/PUTTY

Open Terminal/Putty with icon similar to the one on the right. Move to the Downloads folder and change the permissions for the key.

```
cd Downloads
ls kkowshalyaa.pem
chmod 600 kkowshalyaa.pem
```
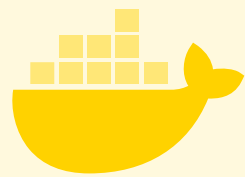

3

SSH TO THE INSTANCE.

Use the IP of the instance mentioned in the mail and the key attached to SSH to the instance using **"ssh -i <key_file> ubuntu@<IP>"**

```
ssh -i kkowshalyaa.pem ubuntu@3.3.4.5
```

4

MOVE TO THE DOCKER SPACE

Go into the docker container space using the command - **"sudo docker exec -it test-mysql bash"**

5

USE MYSQL PASSWORD SENT IN EMAIL

```
bash-4.4# mysql -u root -p
Enter password:
```

SQL
