4 STEPS

TO USE COMPUTER NETWORKING LAB SPACE

2 attachments

[DOWNLOAD]

📄 kkowshalyaa.pem
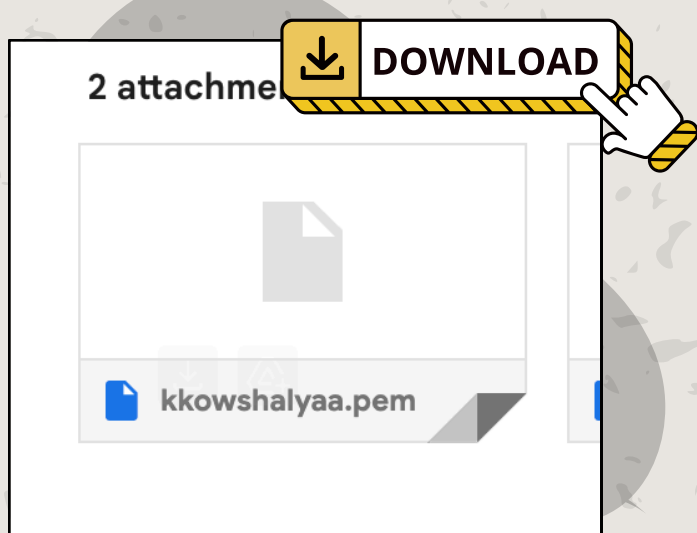

1
DOWNLOAD PRIVATE KEY.
Download the file ending with .pem attached with this e-mail.

2
OPEN TERMINAL/PUTTY
Open Terminal/Putty with icon similar to the one on the right. Move to the Downloads folder and change the permissions for the key.

```
cd Downloads
ls kkowshalyaa.pem
chmod 600 kkowshalyaa.pem
```

3

```
ssh -i kkowshalyaa.pem ubuntu@3.3.4.5
```

SSH TO THE INSTANCE.
Use the IP of the instance mentioned in the mail and the key attached to SSH to the instance using **"ssh -i <key_file> ubuntu@<IP>"**

4
YOU CAN CONTINUE USING SCAPY AND TCPREPLAY
You can have now use scapy to analyse packets and tcpreplay and tcpdump to capture and replay network packets.
